(54) Title: LIPID-BEARING PREPARATION, IN PARTICULAR COSMETIC PREPARATION

(57) Abstract: Described is a lipid-bearing preparation, in particular in the form of a stick or a workable paste, which is suitable for cosmetic uses, in particular in the field of decorative cosmetics for coloring and improving the appearance of the skin, the lips and the eyelids. It is also suitable as lip gloss, as lipstick fixing, as lip care, as a care foundation for skin care or as sun-protection agent. That lipid-bearing preparation is in water-free form and contains in the lipid phase exclusively vegetable-base raw materials. In that respect a combination of hydrogenated jojoba oil (INCI: hydrogenated jojoba oil) and the oil from the seeds of meadowfoam (INCI: Limnanthes alba) has proven to be particularly suitable. The preparation can additionally contain coloring agents and suitable cosmetic active substances. Also described are methods of producing that preparation. Also described is the use of vegetable or vegetable-based raw materials or natural scents or scents which are identical to nature or mixtures thereof for preserving the water-free lipid-bearing preparations according to the invention.
